RAISING THE STANDARDS IN LIGHTWEIGHT ROOFING

# STIPPLE COAT

Britmet's exterior decorative stipple is a flexible coating that will allow natural movement without cracking. Durable and reliable stipple coating with great water resistance and easily applied with a textured roller. Also available with a Class 2 flame retardant certificate.

## USAGE:

For exterior use on wood surfaces such as exterior plywood, hardwood, masonry and other surfaces.

## APPLICATION DETAILS:

**Roller:** Apply evenly using a well loaded textured or iris roller.

**Cleaning:** Materials and equipment should be washed in water. Skin should be washed in hot water and soap.

**Coverage:** 1 square metre per litre.

## DRYING AND RECOATING:

**Touch dry:** 8 hours.

**Fully dry:** 24-72 hours.  
(In wet and damp conditions, drying time will be longer.)

## ADVANTAGES

- Flame retardant available
- Dirt resistant
- Waterproof
- Extremely durable
- Allows timber to breathe
- Does not crack
- Mould and algae resistant
- Covers fine cracks
- Available in any colour
- Made in the UK

*"I have always received good service from Britmet, we use them regularly the quality of the product and the care from the support staff to are second to none."*

*- Mr L Hammond*

# MASONRY COAT

Britmet's smooth masonry coating is a strong, reliable product. This finish can be applied to many surfaces, including our stipple coat.

## USAGE:

For exterior use on wood surfaces such as exterior plywood, hardwood, masonry and other surfaces or over existing water based acrylic textured or smooth paint.

## APPLICATION DETAILS:

**Roller/Brushes:** apply when using a well loaded brush or roller.

**Cleaning:** materials and equipment should be washed in water. Skin should be washed in hot water and soap.

**Coverage:** 8 to 10 square metre's per litre.

## DRYING AND RECOATING:
